

## ENVIRONMENTAL POLICY

The Environmental Policy of CIPSACIRCUITS SAU constitutes the public declaration of its intentions and principles, which decisively influence the establishment of environmental objectives.

**MISSION:** CIPSACIRCUITS SAU is a manufacturing company of Printed Circuit Boards, as well as complementary products and services for the electronics sector, contributing to the success of our customers.

**VISION:** For CIPSACIRCUITS SAU the commitment to the environment and sustainable development is part of its essence and is projected towards sustainability.

**VALUES:** CIPSACIRCUITS Direction is committed, actively, to:

- Analyse the context and intrinsic risks, to ensure the viability of the organization.
- Know and comply with applicable legal requirements related to environmental aspects.
- Establish and monitor the objectives and the environment targets always focusing under a life cycle approach to our activities, products and services, with the main objective of preventing pollution, sustainable use of natural resources and reduction of environmental impact to achieve the continuous improvement of the Environmental Management System
- Train and inform their employees to develop an environmentally safe and proper work.
- Document, evaluate, and update this environmental policy to adapt to the new circumstances of the organization and its surroundings, as well as communicate to all CIPSACIRCUITS staff, major suppliers and customers.
- Minimize the environmental impacts caused by its activities, products and services, which include energy consumption and waste generation.

The implementation of our Environment Management System and the achievement of this Policy are based on the effort and involvement of management, technical divisions and each CIPSACIRUCITS workers, who are actively involved to perform their daily tasks in an environmentally responsibility.
